

CMI–Analysis Software

Jon Beech
Somoud Saqfelhait

collaboration between

- ▶ Touchstone
- ▶ Yorkshire & Humber Improvement Partnership (YHIP)
- ▶ Leeds Partnership Foundation NHS Trust

What is it all about

- ▶ A piece of software that helps spot trends in BME service use over time

- ▶ Compares National, Regional and Local Data from
 - Count Me In and
 - Census

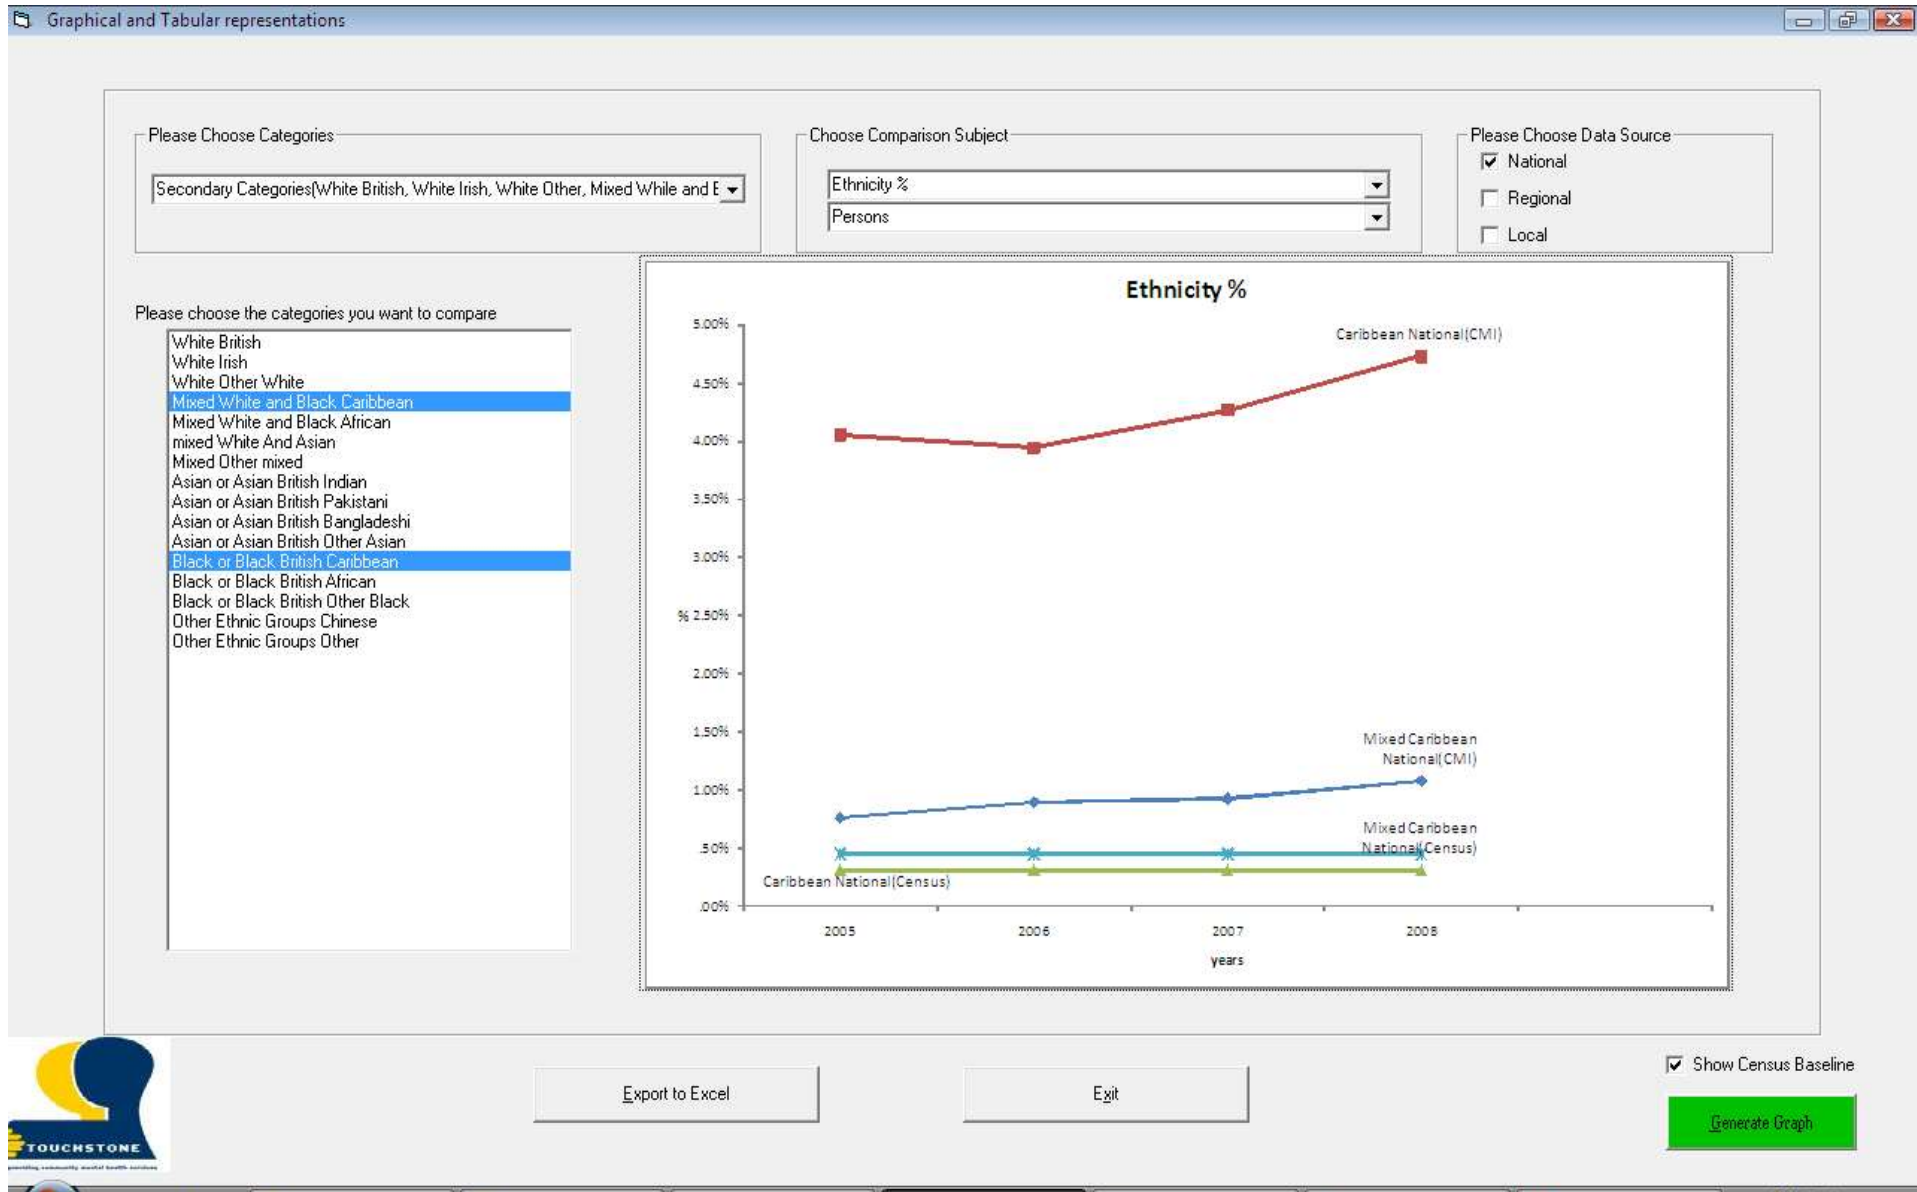

Who is it for?

- ▶ Community Development Workers (CDWs)
- ▶ Mental Health professionals
- ▶ People working on a strategic level within secondary care
- ▶ Commissioners
- ▶ Anyone who is interested

What does it look like

Why is it helpful

- ▶ This software allows us not to only look at the data in graphical format but also to spot trends over the years
- ▶ No statistical experience required
- ▶ Count me In data is produced yearly on national, regional and local levels
- ▶ An excel sheet is produced for both national and regional data and is available for public on the care quality commission website. A report is also produced and the format of each of these varies year on year.
